Has your child been diagnosed with an autism spectrum disorder?

Vision problems can be easily overlooked such as:

- poor eye contact
- fleeting peripheral glances
- sensitivity to light
- side viewing
- difficulty attending visually

It is not necessary for a patient to be verbal to have a vision evaluation with an optometrist at Northwest Eye Care Professionals. Our doctors and therapists are very experienced in evaluating and treating patients with autism.

Our doctors and therapists work with each individual patient on improving issues which are causing difficulties with large and fine motor coordination, depth perception, and understanding body and space.

Northwest Eye Care Professionals has been providing comprehensive vision care and vision therapy for adults and children for over 30 years.

Our offices are a full scope optometric practice dedicated to providing the highest quality care with the state of the art equipment.
